

March 23, 2020

To Our Customers, Suppliers and Employees:

Regarding recent government orders including the “shelter in place” executive order, Special Metals, Inc. falls under at least three critical infrastructure sectors as defined by the U.S. Department of Homeland Security during the COVID-19 outbreak, seen at <https://www.cisa.gov/identifying-critical-infrastructure-during-covid-19>. These sectors are: Critical Manufacturing Sector, Energy Sector and Defense Industrial Base Sector. The continued operation of these sectors is important for the functioning of the country.

Special Metals, Inc. will remain open during this “shelter-in-place” order to support these critical sectors. We will continue to practice all recommendations from the CDC and state and local agencies to protect our employees and their families, which is of utmost importance during these uncertain times.
